

About the SPCA Home Learning Booklets

About

Thank you for downloading one of SPCA's Home Learning Booklets. We are so happy you want to learn more about animals and we are excited to see some photos of the activities you do. Here are some instructions on how to use these booklets.

We have three sets of booklets. Each set has similar activities; choose a set that will be the best challenge for you. In each set there are three booklets; one for companion animals, one for farmed animals and one for wildlife.

Each booklet has 12 activities. We would like you to do at least 7 of the activities. There are different types of activities that include arts and crafts, reading, writing stories and maths problems, so that you can choose the type of activities that you enjoy. At the back of the booklet, there is a checklist for you to tick off the activities you have done.

Once you have completed at least 7 activities, send a copy of the checklist you have filled in at the back of the booklet and photos of your two favourite activities to <u>education@spca.nz</u>. We would love to share your work, so by sending in your photos you are agreeing for SPCA New Zealand to share your work on the SPCA Kids' Portal and within SPCA social media postings. If you do not want your photos to be shared, please tell us in your email when you send them in.

When you send us your checklist and photos we will send you a digital badge to recognise your hard work.

You may only want to do one booklet, or you may want to do all three in the set. Send in your work to get the digital badge each time you complete a booklet. If you decide to complete all three booklets, send a picture of all three of your digital badges to show us that you have completed them all and receive an SPCA Certificate and paw badge you could pin to your school bag or pencil case.

Some of the activities will be done in the booklet and for some of the activities you will be creating things. You can print the booklet and fill in the activities on paper or you can download the booklet and fill in the activities digitally. For any activities that you do not do in the book, take a photo of what you made or what you did, and add it to your booklet.

At the back of the booklet there is a colouring sheet which you may like to do and some information about other ways you can get involved with SPCA. There are also some blank pages if you need more space to do any of the activities.

If you need any information about animals to help you while you are working through these activities, go to the **SPCA Kids' Portal** for information about caring for lots of different animals and how to be a responsible animal guardian.

Safety Reminders

The safety of you and the animals that are part of the activities is the most important thing while working through these booklets. Below we have made a list of things to help keep you and the animals safe.

- > Always have an adult with you if you are completing an activity away from home. For example, visiting the library, a farm or a local habitat.
- > Always have an adult helping you if you are working with tools.
- > Make sure you are being cyber safe if you are working on the computer for any of your activities.
- > All enrichment items or other items that are for animals must be checked by an adult before they are given to the animal. Any items that are for an animal that is not yours must be checked by that animal's guardian before the items are given to the animal.
- > All enrichment items must be made with non-toxic materials and have no loose, sharp or broken bits on them that could injure an animal. Ask an adult to help you get together your materials.
- > Animals need to be supervised while they are using enrichment items. Items with string can be dangerous if animals are left alone with them and should be packed away when play time is over.
- > If you are observing animals or taking photos of them, give them lots of space and watch them calmly and quietly. The amount of space they need with depend on the animal. If you are observing a companion animal, you are able to be much closer to them than if you are observing wildlife. This is important to keep yourself and the animals safe.

It's now time to begin! ENJOY!

Let's go. Follow me!

SPCA Education

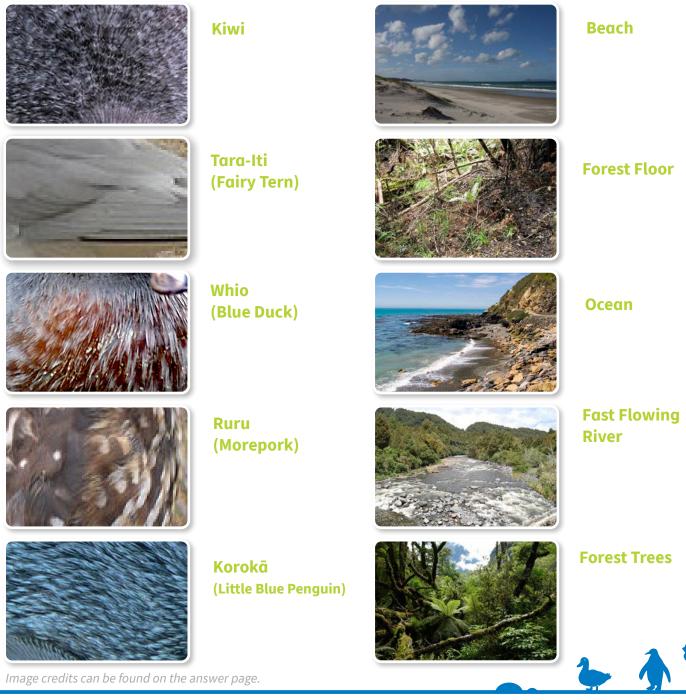

Where Do I Live?

An animal's home is called a habitat. Different types of animals have different bodies to help them live in their habitat. How an animal's body looks can often tell us what sort of habitat that animal is suited to living in.

Many animals can camouflage in their habitat. This means they look like the plants, leaves, rocks, water or other parts of their habitat so that they can hide to keep safe.

Look at the pictures of the birds' feathers below and draw a line to match them to their habitat, where they live. Think about how their feathers would help them to camouflage in their habitat.

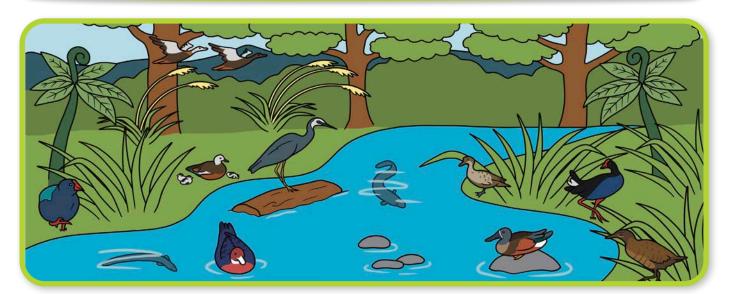

Spot the Difference

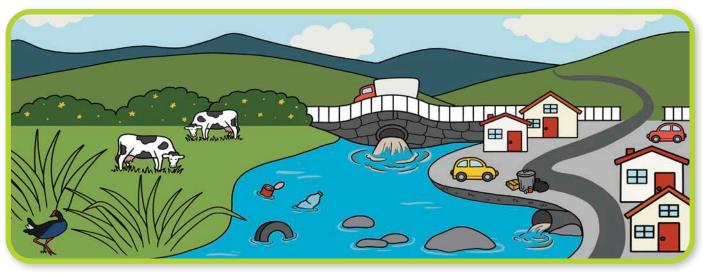

Freshwater and wetland habitats are home to many important New Zealand plants, birds, insects and fish. These habitats include lakes, rivers, swamps, and streams. Sadly, 90% of our wetlands have been destroyed, mostly because of farming and houses being built on or near them.

Look at the two pictures below. The top one shows a freshwater habitat before humans had arrived in New Zealand. The bottom one shows some of the ways freshwater habitats have changed now that people are living in New Zealand.

Make a list of the changes that have happened that you can see on the next page.

Tip: You can help take care of our freshwater and wetland habitats by planting the right plants around them and always putting your rubbish in the bin.

It's time to use your imagination and get creative! Make up a wild animal and tell us all about them. Your animal can be as silly as you like. You get to design what your animal looks like, where they live, what they eat, how they move, what they enjoy doing and more.

Finish the sentences below:

My wild animal is called _____

My wild animal lives _____

My wild animal eats _____

My wild animal enjoys _____

Draw a picture of your wild animal

Write a story all about your animal on the next page. It could be about what their day is like or about a problem they had and how they solved the problem.

Māori Legend How The Kiwi Lost Its Wings

Manu (birds) had a significant place in traditional Māori life and are still a very important part of Māori tikanga (culture). The Kiwi in particular is a unique taonga (treasure) and for this activity you will explore the Māori legend 'How The Kiwi Lost Its Wings' to find out why they are special.

One day, Tāne-mahuta was walking through the forest. He saw that his children, the trees, were getting sick as the bugs were eating them.

His brother, Tāne-hokahoka, called his children, the birds of the air, together. Tāne-mahuta asked the birds who would come down from the forest roof and live on the forest floor to help save the trees.

All of the birds were quiet. The forest floor was cold, damp and dark.

Tāne-hokahoka asked Tūī. Tūī said that the forest floor was too dark and he was scared of the dark. Tanehokahoka asked Pūkeko. Pūkeko said that the forest floor was too damp and he did not want to get wet feet. Tāne-hokahoka asked Pīpīwharauroa. Pīpīwharauroa said that he was too busy building a nest for his family.

Tāne-hokahoka felt sad. He knew that if one of his children did not come down to the forest floor Tānemahuta would lose his children and the birds would lose their home.

Tāne-hokahoka asked Kiwi. Kiwi looked at the sun coming through the trees and looked at his family. He said he would come down to the forest floor. Tāne-mahuta was happy but he warned Kiwi of what would happen. He told him that he would grow thick, strong legs so that he could rip apart the logs on the ground. He would also lose his coloured feathers and wings so that he would not be able to go back up to the roof of the forest.

Tāne-hokahoka asked Kiwi again and he said that he would go down to the forest floor.

Tāne-hokahoka looked at the other birds. He told Tūī that he would wear two white feathers on his throat to show he was a coward. He told Pūkeko he would live in the swamp forever because he did not want to get wet feet. He told Pīpīwharauroa their eggs would have to be laid other birds' nests now because he was too busy building his own nest.

Tāne-hokahoka then told Kiwi he would be the most well-known and loved bird of all.

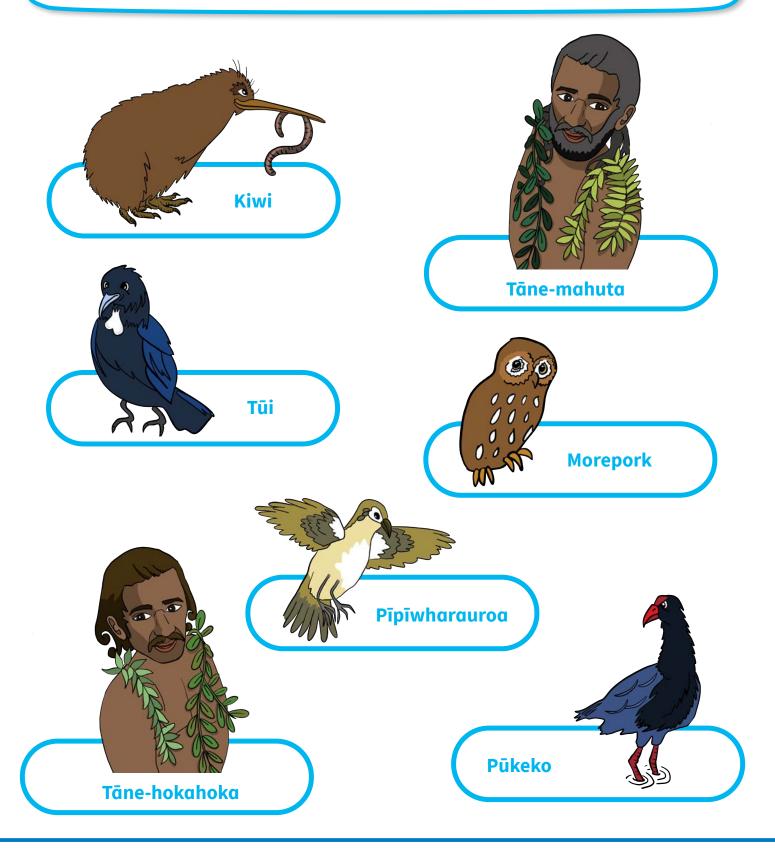

Puppet Story Telling

You are now familiar with the Māori legend 'How The Kiwi Lost Its Wings'. You may like to retell the legend to others through a finger puppet show.

Print and cut out these finger puppets. Use the puppets to retell and perform the legend.

How Many Birds?

We are lucky to have so many special birds in Aotearoa, New Zealand. Sit quietly in your back garden or at your local park, beach, bush or wetlands and watch the birdlife around you. Look with your eyes and listen with your ears. How many different species (types) of birds can you see?

Visit <u>nzbirdsonline.org.nz</u> to help you work out the names of the different species.

To help you count them all, create a tally for each bird species, then add them all up at the end to see how many birds you saw altogether.

The birds may come and go while you are watching. So that you don't count the same birds twice, just write down the most you see together at one time. For example, if you see two sparrows, record two tally marks. If they fly away into the trees and then you see four more sparrows, two of them could be the same sparrows you saw first so just add two more tally marks to make four, not six.

| Name of Bird Species | Number of Birds |
|--------------------------|-----------------|
| e.g. Tūī | Htt I |
| | |
| | |
| | |
| | |
| Total of birds observed: | |

There are spare pages in the back of this booklet if you would like to draw a picture of your favourite bird. Remember not to feed birds bread as this can make them sick. As you watch the birds you may notice the healthy, natural foods they do like to eat.

How Much Rubbish?

Many of the foods we eat come pre-packed, often in plastic. This packaging becomes rubbish as we often don't use it again. Rubbish can be really bad for the environment, animals and plants so it is important to try and make less rubbish where we can. Over the next week you will keep a record of how many pieces of rubbish you have left in your lunchbox at the end of each day.

Count how many pieces of rubbish are in your lunch box each day and record it in the table below. Also write or draw what type of rubbish each piece was, for example, a muesli bar wrapper or a piece of plastic wrap from a sandwich. At the end of the week add up how many pieces of rubbish you had altogether.

| Day | Number of Pieces of Rubbish | Type of Rubbish |
|--------------|--------------------------------|-----------------|
| Monday | | |
| Tuesday | | |
| Wednesday | | |
| Thursday | | |
| Friday | | |
| Saturday | | |
| Sunday | | |
| Weekly Total | | |

What type of rubbish did you have the most of?

Could any of the rubbish be recycled or put in the compost instead of going in the normal bin?

Can you think of one piece of packaging in your lunch box that you get rid of to save on rubbish? Maybe you could use a reusable bag or container for something.

SPCA Education

Bug Hotel

Insects are very important. They help to pollinate plants (which means new plants can grow), control pest insects and help to keep the soil healthy. Make a bug hotel to help the insects in your garden and give them a safe home.

Follow the instructions below and make your very own bug hotel!

Recycled Materials

You could use:

- > Glass jar
- > Ice cream container
- > Milk carton
- > Cardboard
- > Twine or string

Natural Materials

You could use:

- > Leaves
- > Moss
- > Bark
- > Sticks
- > Pinecones

Instructions

You will need a container and natural materials to fill it with. Get the materials you are going to use and clean the recycled items well. Then you can decide how you will fill your container with the natural materials. It helps to put the heavier items at the bottom and then fill the rest of the container up with the lighter items.

Place the finished bug hotel in your garden for the insects to enjoy.

Bug hotels can be made out of many different natural and recycled materials. Have a look around your garden or local park, and in the recycling bin for materials to use.

Sun Catchers

. ب

Window strike is when a bird accidentally flies into a window. Windows often reflect the clouds, sky or trees, meaning birds can't see them and they fly into them. This can cause serious injuries or the bird may even die. To help stop birds flying into your windows you can hang items in them so that the birds can see them.

It's time to get crafting! For this activity you will be making a sun catcher to hang in your window to help stop window strike. Follow the instructions below.

Materials

You could use:

- > Thick paper or card
- > Tissue paper or cellophane
- > Scissors
- > Cellotape
- > Glue
- > String

Instructions

- 1. Start by printing or drawing your chosen animal onto thick paper.
- 2. Cut around the image or drawing and inside the image, leaving a 2cm border.
- 3. Cut tissue paper or cellophane into strips.
- 4. Glue around the animal border and place the strips of tissue paper or cellophane across the back of the animal outline.
- 5. Cut off the tissue paper or cellophane that is hanging over the side.
- 6. If you like, repeat steps 1 and 2 and then glue the second border to the back of your animal sun catcher.
- 7. Tape a piece of string to the back of your sun catcher.
- 8. Hang your masterpiece in your window!

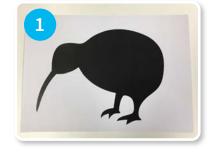

Manu Aute Bird Kite

Kites are a part of traditional Māori culture and were flown for fun and to communicate with people far away. The kites were often shaped like birds and were made from natural materials such as wood, bark and branches and were decorated with toetoe, shells and feathers.

For this activity you get to create your own manu aute, bird kite!

Materials

To make the frame you could use:

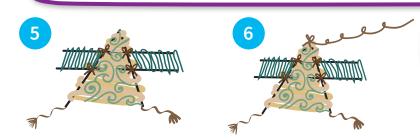

- > Light wood or sticks
- > Harakeke flax
- > Cardboard
- > Paper
- > Toetoe
- > Fabric
- > String

- To decorate you could use:
- > Feathers
- > Shells
- > Paint
- > Pens
- > Ribbon
- Tools:
- > Scissors
- > Cellotape
- > Craft glue

Instructions

- 1. Collect the materials you will need. Manu aute were traditionally made with natural materials but you can use whatever other materials you have available to you.
- 2. Create the manu aute frame like the one in the picture. You could use toetoe, cardboard strips or tubes, sticks or light wood. Use string to tie the frame together where the rods meet.
- 3. Use harakeke, paper, cardboard or material to add a sail and wings. Use glue or cellotape to attach the sail. Wrap harakeke or strips of papers, material or cardboard around the wings.
- 4. Add patterns and designs to the sail of your kite. You could use paint or pens. You might like to research traditional Māori designs, and their meanings.
- 5. Decorate your manu aute with feathers and shells. Kites often had long tail feathers, known as pūhihi, on the bottom or ends of the wings.
- 6. Tie a long piece of string to the top of your kite.

You have made a manu aute! On a windy day you may like to ask an adult to help you test your kite out to see if it flies.

Interesting fact: Manu is the word for both bird and kite in Te reo Māori.

Nature Photography

New Zealand's wildlife lives in many different types of homes. Their homes are called habitats. Go on an adventure exploring your local community in search of wild animals, such as birds, lizards, insects and sea creatures like penguins, fur seals and fish.

Sit quietly and watch the wildlife in their habitat. Make sure to look with your eyes and do not get too close to the animals.

Now, take photos of one wild animal and their habitat. Capture all the different features of their habitat. Think about what the animal needs in their habitat to keep them happy and healthy. What do they eat? Where do they sleep?

Once you are back home use the photographs you took to create an art piece. This could be done digitally on the computer or you could print the photographs and create a collage.

Litter Clean Up

Litter is bad for people, animals and the environment so it is important we throw away our rubbish in the right places and keep our community free of litter. We must take care of the environment and the living creatures within it.

For this activity you will go on a litter clean up walk around your neighbourhood, then throw away the litter in the right place.

Tips

Tips to keep yourself safe when picking up litter:

- > You must have an adult with you
- > Wear covered in shoes
- > Wear thick gloves, like gardening gloves
- > Do not pick up sharp objects or any medical waste
- > Wear high-visibility clothing if you are near a road

As you walk around your neighbourhood picking up litter, here are some questions to think about and talk about with the adult who is with you:

- > What types of litter are you picking up?
- > Are you picking up a lot of one type of litter? For example, fast-food packaging or water bottles.
- > How could the litter be dangerous for an animal?
- > Where might the litter end up if you didn't pick it up?
- > How will you throw away the litter at home? Which items can be recycled? Which items can be put in the compost?

Education

Bee-Friendly Gardening

Dig-in! For this activity you will be creating a bee-friendly garden.

Bees have a very important job - pollinating plants. When they pollinate the plants it means new plants, flowers, fruits and vegetables can grow. There are a few simple things you can do to help get bees to come to your garden and to help take care of these important insects.

What does a bee-friendly garden need?

Plants

Just like us, bees need food, and they feed on the nectar and pollen of plants. Visit your local garden store to buy the right plants. Ask the shop assistant for help finding bee-friendly plants. Plant the plants in your garden and make sure you water them.

Water

Just like us, bees need water to drink. Find a shallow container, such as a saucer, pan or bird bath to fill with water. Bees cannot swim so place a few small stones or small pieces of wood in the water for them to sit on while they drink. Make sure you put fresh water in to keep it clean.

Education

You might also like to build a bee hotel. Just like a bug hotel, you can create a safe place for bees by giving them a place to hide and rest. A bee hotel can be made using recycled materials. Go back to the Bug Hotel activity for more details. Most New Zealand native bees live in small holes in the ground. To help encourage native bees to your garden, use small hollow bamboo sticks in your hotel.

 Bees like manuka, daisies, dandelions and snapdragons.

> Plant New Zealand native plants to encourage and care for our native bees.

> Bees love the colours blue and yellow.

Tip: Remember not to use pesticides in your garden as this will kill bees!

Activities Checklist

More Ways To Be Involved

We hope you enjoyed working through this booklet! Are you looking for more ways you can learn about animals and be involved with SPCA now that you have finished the booklet?

The SPCA Kids' Portal

- The SPCA Kids' Portal has puzzles (and these puzzles and even more puzzles) colouring pages, origami, drawing instructions, a place to share your work and lots of quizzes.
- > Check out the <u>SPCA Kind Matters Kids' Newsletter</u>. Kind Matters comes out every term and had loads of information about all sorts of animals, instructions for craft activities, competitions, puzzles and more. Ask an adult to help you subscribe to this with an email address.

Donate for the Animals

SPCA Kids

Kind Matters

Kia Ora and Happy New Year

PCA Competitie

- > Make enrichment items to donate to your local SPCA Centre. When animals come to SPCA Centres we love to be able to give them enrichment items to play with to keep them busy.
- > Take part in SPCA Cupcake Day. SPCA Cupcake Day happens once a year and is a fun and tasty way you can help raise funds for SPCA to help us care for the animals.

Connect Online

- > Ask you families and teachers to keep up to date with SPCA's Education Programme for kids by joining the <u>SPCA NZ Education Community group</u> on Facebook.
- > Let your teachers know about the SPCA Teachers' Portal.

Help Animals In Your Community

> Go to the <u>SPCA Kids' Portal - Wildlife</u> section to find out more kind conservation activities that you can do to help the wildlife in your community.
