

Fleece Forest

It is really important that you provide constant access to hiding places within your rabbits' home. This allows your rabbits to escape and hide, which is a natural behaviour. Fleece forests make the perfect rabbit (or even guinea pig) hide out. Small animals will feel safe, secure, and reassured in these cosy hideaways!

Materials needed:

- > Fleece blanket
- > Scissors
- > Cardboard box

Instructions:

- 1 Start by removing all tape from your box, remove the flaps on the bottom, and draw a half oval on one side.
- 2 Cut out the half oval shape to create an entrance to your fleece forest.

Fleece Forest

- 3** With the help of an adult, make holes in the top of the box.

- 4** Cut the fleece into strips slightly longer than the height of the box.

- 5** Thread two strips of fleece through one hole.

- 6** Tie the two pieces of fleece together to secure the strips in place.

- 7** Continue steps 5 and 6 until you have filled all of the holes.

- 8** Now your fleece forest is ready for some lucky small animals to enjoy!
