

Mouse Tunnel

Mice have a strong instinct to use and make tunnels. One of the ways mice guardians can meet this behavioural need is by providing their mice with ready-made tunnels. This simple tunnel uses materials most people have on hand at home, so it's super quick and easy!

Materials needed:

- > Cardboard tubes
- > Popsicle sticks
- > Scissors
- > Non-toxic glue

- 1 Cut one side of the cardboard tube to create a tunnel shape.

- 2 Flatten the cardboard tube and glue popsicle sticks along the outside.

- 3 Allow to dry completely before giving the tunnel to your mice!

Note: Parents and guardians - it is essential to ensure that this enrichment item and the materials used are safe and appropriate for your particular companion.
