

Toilet Roll Stick Toy

This makes for a simple, fun toy for your rabbit. It encourages self-directed play as they can chew on it or toss it around!

Materials needed:

- > Scissors
- > Toilet roll, clean of adhesive
- > Twigs

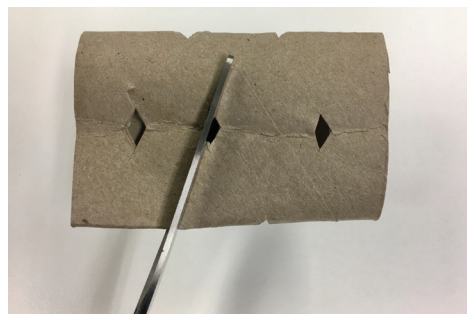

Make sure to use twigs that are safe for your rabbit. Twigs from trees such as willow, apple, pear, poplar and citrus or other untreated wood treats are safe and will keep their teeth worn down. Avoid trees which have been chemically treated or are close to sources of pollution. If you're unsure, always check with your veterinarian to make sure the wood is not toxic.

Instructions:

- 1 Use your scissors to cut several small holes all around the toilet roll.

Ask a parent or guardian to help you and use extra caution!

- 2 Push the sticks through one hole of the toilet roll and out another.

Make sure that the ends of the twigs are not sharp and that you supervise your rabbit while at play.
